25X1

1. About 15 twin-engine low-wing monoplanes with double rudder assemblies practiced flying over the Strausberg (N 53/V 15) airfield on 20 September 1950. Since there was no flying between noon and 3 p.m. The planes had probably come from the Werneuchen (N 53/V 06) airfield.
2. From 50 to 60 twin-engine low-wing monoplanes with double rudder assemblies were parked at the usual sites on the northern edge of the field. * The hangar was closed. Bombs were stored east of the aircraft.
3. Work on the highway beside the field was to be completed by 31 October 1950. Truck [] was seen in Strausberg.

25X1

* Comment. More than 50 planes are reported to be stationed at the field in September 1950 whereas an average of 35 to 40 PB-2s were observed prior to mid-August 1950. [] However it was observed in Werneuchen that the aircraft strength was reduced. [] It is believed therefore that one bomber regiment from Werneuchen was transferred to Strausberg. No other indications of a transfer were observed.
